Comfort & Health

Modular Design

The modular frame-based design:

- provides extra choice
- permits future-proofing, by changing components
- is easy to repair and recycle
- is made in the UK

Acer Frame

Removable armrest

Why Choose the Acer?

SomaCare

Fortuna.Bambach

Fortuna has long-standing expertise in providing seating suitable for people with complex clinical needs.

We saw a need for a new type of high back chair, as choice has previously been limited and often expensive:

- Cheap vinyl seats with metal frames but no healthcare benefits
- 'Fireside chairs' look good but are not adjustable so many people sit in the wrong size chair, which is bad for posture, circulation and comfort

With our new SomaCare Acer we've created an attractive, great value chair with pressure relief, posture management and increased comfort!
