

# RENTAL

We can provide a variety of rental options to suit your needs on a wide range of products.

Delivery and collection service

# RENTAL

## Key rental benefits include:

### Flexibility

#### Short or long-term rental:

Mobility equipment is an investment and life can be unpredictable. Renting provides you with an option to benefit from the equipment just as long as you need it. Equally you may have an injury or a guest staying with you that means that you only require equipment for a short period of time.

#### You can change equipment as required:

Sometimes your needs will change over time. Rather than being left with obsolete equipment that can be challenging to dispose of, renting allows you to change the items to meet your changing needs.

### Availability

There can be a lengthy lead time associated with ordering bespoke and specialist equipment. Most rental equipment is immediately available.

### Peace of mind

If you rent from us, we will make sure that your rental is carefree with free servicing and guaranteed maintenance if required.

### Try before you buy

If you are not sure whether you would benefit from a higher value item, you can ask about renting it before making a financial commitment.
